Last update: Apr 28, 2023

- Papers in the fields of **systems** for **data engineering**, **data management**, and **machine learning**
- This Semester's **Umbrella Topic**: **“Extensible Data Systems”**
  - Motivation
    - Meet requirements of **emerging applications** (multimedia, machine learning, domain-specific, ...)
    - Enable the timely **adoption of novel techniques and technologies** (algorithms, hardware, ...)
    - Handle the **increasing specialization** (data models, data representations, algorithms, hardware, ...)
    - **Facilitate research** at systems and algorithms level
  - Active field of research for decades (at least 1980s till today)
  - Interesting challenges
    - **Which abstractions** are needed?
    - **How to enable users** to extend the system?
    - **How to reach efficiency** in spite of these abstractions?
  - Concepts have been proposed at all levels of the system stack
